AMC. For wellbeing wherever you may be.

Protecting wellbeing for nearly 35 years.

We have over 30 years' experience providing quality cleaning and specialist disinfecting services. Over this time, we've learnt how the changing functions of workplaces can impact on the wellbeing of staff and clients.

Our experience makes us agile.

In addition to delivering a structured scope of cleaning services for offices, we also include measures for optimisation; such as predictive maintenance, real-time localisation, data-based decisions on utilisation and agile maintenance.

Consistent excellence.

To provide you with peace of mind, we've developed a unique Operations Excellence Model to ensure our team understands their roles and responsibilities across a multi-layered service structure.

Real-time performance management

To make sure you're happy with our cleaning service, we have an online auditing and performance management system that provides prompt identification of issues, efficient resolution and transparent real-time reporting at all sites.

Protecting the wellbeing of our planet.

We continually strive to improve our environmental performance through the systematic management of products, equipment and processes.

AMC. Cleanliness is productiveness.

Let's make a healthy living.

On average, adults spend 6.8 hours at their desks every day, which is more time than they spend in bed. So if you want to keep your staff happy, keep them healthy. Happy staff members are more productive, have higher job satisfaction, take fewer sick days, have reduced chances of burn-out and have increased loyalty to their employer.

Helping your staff stay healthy.

Illness can cause staff to take sick days. And sick days can cost thousands of dollars per employee each year. That's why it's important to look after their wellbeing with a healthy working environment.

Good first impressions.

A clean, uncluttered environment gives your team a sense of pride where they work. This is not only a major contributor towards satisfaction, it's also important for making a good first impression on new staff and clients.

Clean desk, clear mind.

Desks and the items on them, such as phones, keyboards and computer mice can harbour bacteria and germs. Having a cleaner desk reduces the risk of illness. A well-ordered desk also encourages a clearer headspace to focus on the things that matter most for maximum productivity.

Trusted local sector experience.

AMC offers trusted expertise within specific industry sectors. All our personnel undergo thorough background and police checks.

We're committed to doing things right.

We maintain a strong commitment to our planet and its future, striving for continual improvement wherever possible. This includes minimising waste, recycling where possible, using biodegradable cleaning products and maintaining an environmental reporting system. We source ethically through Wirrpanda Supplies and Who gives a crap and drive social change by supporting Wallara and Children's Cancer Institute.

We are also committed to creating better futures for people. We promote inclusive workforces with respect for diversity of race, gender and abilities. We also take a firm stance against modern slavery, with special policies to protect people from exploitation.

To improve hygiene practices in workplaces we collaborate with Ecohygiene, who are supporters of change makers One Girl. Ecohygiene is also a member of 1% for the planet, a global network of businesses tackling our planet's most pressing environmental issues.

Proudly supporting
Children's Cancer Institute.

Protect the wellbeing of your staff, clients and customers today. Call AMC Commercial Cleaning. We'd love to hear from you!
